DETAILED ACTION

Continued Examination Under 37 CFR 1.114

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 10 December 2007 has been entered.

Claim Rejections - 35 USC § 112

2. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

3. Claims 26-44 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. In independent claim 26, there is lack of antecedent basis for "the drive disc", "the top disc" and "the disc". In independent claim 35, "drive disc" has been changed to "drive disc hub"; subsequent references to "the drive disc" are somewhat confusing. In independent claim 44, there is lack of antecedent basis for "the drive disc".

4. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

5. Claims 26-44 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The combination of claim features was not described in the originally filed application. Particularly, a "blade pair member having a central mounting portion" was not described in combination with the keyway/pin/shoulder bolt/ embodiment(s). Furthermore, a drive disc having a circular pattern of holes was not described in combination with the keyway/pin/shoulder bolt/ embodiment(s). Also, a disc being *welded to the drive shaft* was not described in combination with a "drive hub adapted to surround the drive shaft and *slide axially along the drive shaft*".

Response to Arguments

6. Applicant's arguments are moot due to the new grounds of rejection.
